Who we are:

digital : *relating devices that can read, write, or store binary information (1's and 0's).*
securus : *(Latin) safe, secure.*

Digital Securus is an Information Security Consulting Group whose officers have over 30 years of experience in the fields of Information Security, System Administration, and Law Enforcement.

We provide discreet and confidential information protective services to consumer, industrial, and governmental agencies.

What we do:

Digital Securus provides organizations with the information security knowledge they need to protect their valuable electronic resources. We provide information security consulting for small, medium and large organizations.

Our goal:

The goal of Digital Securus is to give organizations the information security necessary to build, repair, maintain, and grow their information systems. We want your data to be there when you and your clients need it most. We can show you how.
